NOBLE DELIVERS WHAT YOU NEED, WHEN YOU NEED IT.

Noble is a U.S. Government go-to supplier for emergency supplies and building materials. Our supply chain includes a large selection of emergency preparedness supplies as well as all the items you would expect to find in a hardware superstore. Maintenance, repair, and operations (MRO) supplies, building and construction materials, tools, and equipment make up the core of Noble's product catalog. In addition to construction and MRO products, we carry thousands of items necessary in emergency preparation, response, and recovery operations.

In the aftermath of a disaster, Noble is ready with the critical supplies needed to sustain victims. Our warehouses, distribution, and fulfillment centers are strategically located around the country and stocked with products that meet NASPO ValuePoint requirements. We work with the DoD, FEMA, state, and local authorities to supply the essentials needed for survival to storm-ravaged regions, offering end-to-end logistical support.

OUR HISTORY OF EMERGENCY RELIEF SUPPORT

- Delivery of emergency supplies such as tarps, baby food, water, and diapers during Hurricane Katrina
- Over 80 truckloads of MREs (Meals Ready to Eat) and drinking water for victims in the aftermath of Hurricane Gustav
- Emergency supplies deployed after tropical storms Harvey and Irma
- Extended support for rebuilding Puerto Rico in the wake of Hurricane Maria. Noble supplied over one million items to Puerto Rico, including enough electrical wire to circle the globe 446 times, 1600 concrete utility poles, over 5000 steel poles, 15 sleeper trucks with 6200-gallon tankers, 40,000 buckets, water jugs, and more.
EMERGENCY PREPAREDNESS PLAN

A SUPPLY CHAIN DESIGNED TO FACILITATE EMERGENCY RESPONSE
Noble's supply agreements enable continuous availability of critical products. Through our network of warehouses and distribution centers, we stock over one million items from 11,000 suppliers, including thousands of products necessary for emergency preparation, response, and recovery. Our supply chain includes numerous manufacturers of essential supplies needed in responses to fires, floods, hurricanes, winter storms, tornadoes, and other state-of-emergency situations. Because we hold agreements with several manufacturers of the same product, we can often rely on large shipments of products sustained for at least 60 days.

HOW DOES NOBLE SUPPORT EMERGENCY REQUESTS?
We leverage our national footprint and years of experience to shorten readiness timelines and enhance effectiveness. When responding to a natural disaster or emergency, there is no more critical time to act quickly. NASPO ValuePoint customers can count on Noble to deliver emergency supplies. With 11,000 established suppliers and 12 distribution and fulfillment centers strategically located across the United States, Noble has both the products and infrastructure necessary to meet the most challenging requirements.

NOBLE’S EMERGENCY RESPONSE PROCESS
1. Contact Noble using one of the contact numbers below:
   a. NASPO ValuePoint Main Line 844-248-9077
   b. Noble’s 24/7/365 emergency support number 877-999-1911
2. Noble POC engages with the Director of Operations and immediately puts Noble’s Emergency Response Team (ERT) into action.
   a. The Noble ERT consists of a Purchasing Manager, an Operations Manager, Customer Service Representatives, and a Logistics Manager.
   b. The Noble ERT analyzes requirements; establishes an order site to track all activities, assesses our inventory, and develops a procurement strategy based on the data.
      - Our procurement strategy includes drawing down stock, contacting in-region vendors to determine available stock levels, and, when necessary, reaching out to manufacturers to begin production.
3. The Noble ERT next puts into action our three-prong approach to surge requirements, which allows us the flexibility to respond to any emergency request.
   a. Draw from the inventory in our warehouses to ship products immediately to our customers via expedited land or air transportation.
   b. Mobilize our established vendors to drop ship to the customer or to our consolidation warehouses where we build and ship orders to surge locations quickly.
   c. Sustain up to a 1,000% production increase for at least 60 days by directing our manufacturers to produce and maintain inventories, sustain

EMERGENCY PREPAREDNESS PLAN

NOBLE'S EMERGENCY RESPONSE PROCESS

increased production capabilities, and ship directly to our customers, as necessary. Noble's vendor agreements contain clauses requiring manufacturers to keep stock for many MRO, building, and industrial supplies, ensuring sustainment of essential items. Surge, mobilization, and operational deployment requirements result in a minimal impact on Noble's operations for any of our government contracts. Our business supports sudden increases in orders or volume year-round. With over 125,000 customers and 225,000 orders filled each year, we have the experience to provide emergency support for NASPO ValuePoint, DLA, GSA, DOS, DOD, and FEMA customers.

HOW WE SUPPORT SURGES AND LONG-TERM DEPLOYMENTS

Financial Stability: Our strong financial stability allows us to fund increased volume immediately. With more than $5 billion in buying power, we have established credit with thousands of vendors. There is no interruption in filling large orders quickly, which puts us in the same league as the largest wholesale distributors in the world. We access multiple manufacturers of the same product and procure all their inventory, put their factories to work, and ship directly from their warehouses.

Superior Systems: Noble's fully integrated EDI-based system encompasses inventory management, order tracking, customer support, logistics, and instant access to product availability and substitutions. Customers have access to complete order visibility, including order status, tracking, account history, and customized reporting features of the NASPO ValuePoint e-commerce website.

Logistics Capabilities: In addition to arranging deliveries of inventory from our warehouse locations, Noble's Logistics Specialists work closely with manufacturers and suppliers around the country to ship directly to our customers. By using direct vendor deliveries, we avoid cross-docking. Direct shipping by suppliers shortens the logistics pipeline and maintains in-region inventory levels. We can supply products within 48 hours and continue the supply sustainment and support for our customers throughout the relief and recovery process.

Communications: Noble's Emergency Management Team (ERT), comprised of the Purchasing Manager, Operations Manager, Customer Service Reps, and the Logistics Manager, notifies each customer of our strategy and gives regular updates via Noble's e-commerce website, email, and phone calls to keep our customer informed. As requirements change, we quickly adapt to the demands of the surge to meet or exceed the delivery schedule with complete visibility to the customer.

FIRE SUPPLIES

• Camping Gear
• Drinking Water
• EMT and Rescue Supplies
• Fire Barrier Foam
• Fire Extinguishers
• Fire Suppression Systems
• First Aid Kits
• Gear Packs
• Insecticides, Pest Control

• Just-in-time Inventory of Gas Cylinders
• Bulk Hazmat Management
• Pollution Prevention (P2) Programs
• and more...

NOBLE NASPO VALUEPOINT EMERGENCY PREPAREDNESS PLAN
EMERGENCY PREPAREDNESS PLAN

HOW DOES NOBLE RECOVER IF AFFECTED BY DISASTER?

Operations Status Assessment
When disaster strikes, our number one priority is to make sure our employees are safe. Once we have confirmation of the status of our employees and operations within the disaster area, we determine the recovery steps to make sure we can support our customers.

Emergency Response Team
Our emergency management procedures include the formation of an Emergency Response Team (ERT) dedicated to assess the situation. The ERT quickly formulates a logistical strategy for supply and sustainment. The location of Noble’s ERT members throughout the United States ensures that if one area of the country is affected, we are still able to deploy the remaining team members into action.

Multiple Fulfillment Locations & Vendor Drop Shipping
Similarly, if any of Noble’s Distribution and Fulfillment Centers are affected, we can utilize the unaffected Distribution Centers and Fulfillment Centers located throughout the country. We also put our established vendors into action to drop ship direct to the affected customers.

Supply Chain, Logistics, and Technology Infrastructure
Our emergency management strategy for NASPO ValuePoint customers is backed by the breadth of our supply chain, local and global sourcing capabilities, and our numerous national locations. Noble combines a supply and logistics infrastructure, state-of-the-art e-commerce systems, and decades of experience handling relief supply for global disasters and other expeditionary supply chain requirements of the U.S. military to support the needs of the states within our NASPO ValuePoint contract portfolio.

FLOOD SUPPLIES
